

Curated metal gift sets, built to last

China-based sourcing partner for corporate gifting programs. We turn a brief into a finished set — materials, packaging, logo, delivery.

Built for onboarding, executive gifting, client appreciation, and wellness programs

Finished sets matched to the gifting moments procurement teams plan most often. Each set is a complete answer — recipient profile considered, materials selected, packaging specified, logo method confirmed.

Verified material specs — brass, titanium, stainless steel, aluminium, and adjacent alloys

Solid material, not coated impersonations. If the spec says brass, the piece is brass. Recipients can feel the difference — that's where the brand impression lasts beyond the unboxing.

Brief to direction in 24 hours

Tell us the occasion, recipient profile, and budget direction. We respond with set recommendation and materials direction the next business day — no sourcing experience required on your side.

Repeat-order pricing locked — your gifting program runs without restart

Onboarding intake, year-end recognition, milestone gifts. We keep set specs, pricing, and lead times consistent across repeat orders — your program continues without re-quoting and re-sampling each cycle.

Give people something that reflects the thought behind it

A curated metal set is a finished answer — occasion considered, materials selected, packaging specified, logo method confirmed. The recipient opens something considered. You present it with confidence.
